

# AGI GTRACK

---

## Why use our asset tracking system?

- Ideal for all types of plant and agricultural Machinery
- A considerable cost saving against competition
- We can supply you with a full self monitoring system with features and benefits that far outweigh the competition.

## What does our tracking system give you that others don't?

1. No contract leading to low running costs
2. SIM Card validity (this feature enables the sim card to send a message to a pre defined number at a time of your choice, Agi will however set this to a default of 60 days)
3. Easy to use through mobile phone sms commands
4. Battery back up.
5. Passive arm (so when the operator leaves his vehicle it will automatically arm the tracking unit and immobilise the machine down until the operator returns leading to better site safety)
6. Remote immobilisation through text message overriding the security keys with the machine/hirer
7. Street level mapping with Longitude and latitude coordinates sent to your mobile for easy location, utilizing any free mapping software available on the net, these coordinates can also be converted directly from your mobile enabling tracking through street name and post code

8. Periodic Vehicle position control the vehicle will alert you if it's position has changed within a given time frame
9. It is also a fully transferable unit so it can move with the machine or stay with you
10. Remote arm and disarm, enables quicker recover times.
11. Not only can we secure your machinery but with one unit but we can also secure other assets on the same site i.e. secure your companies lock box or portakabins using our wireless add-ons with our PIR and Magnetic switch contacts. ( each tracker can pair with up to 13 other wireless devices)
12. Half you're tracking costs with our track request this will enable the unit to send 1 sms Lon and Lat coordinate every 90 sec until full recovery, if you require a location then send a single locate request.
13. Agi can also supply a golden key facility; this enables chosen employees full control over the whole fleet.
