

Caravan/Motor home security

Phantom Target for Caravans

The Phantom Target is a single, compact unit, fitted covertly inside your caravan, giving no clues as to its whereabouts.

The system utilizes 24 orbiting GPS satellites to deliver accurate location information on demand to a dedicated call centre within moments of your theft being reported. This location along with the crime reference number obtained from the client is used to engage the services of the local police and gain recovery of the stolen caravan. As they require no special equipment of their own, the police can simply despatch the nearest officers. Recoveries, therefore, are swift and your caravan likely to be recovered in the same state as when stolen.

The unit is hidden in your caravan drawing the minimum of power from your leisure battery. It would take in excess of 6 months for the unit to drain an 85Ah battery so you can take comfort in the fact that while your caravan is in storage, or on site, it is still being protected.

Because the Phantom Target unit has a backup battery, the unit will still work if the thieves cut the main battery power to the caravan. Cutting power to the system will also alert our control centre, who will relay this information to the customer.

Phantom enjoys a good working relationship with the police who have always responded in a timely fashion.

The system costs £399 inc VAT and fitting.

There is a choice of annual or five year subscriptions at £99 and £349 respectively.

The Phantom Target systems are also the first in the UK to be Sold Secure 'Gold with Control Centre' approved giving caravan owners extra peace of mind

Phantom ProActive for Caravans

Our Phantom ProActive is a single, compact unit fitted covertly inside your caravan, giving no clues as to its whereabouts.

The Phantom ProActive device is able to communicate directly with the call centre and report on the status of the caravan it is protecting. This ingenious device monitors the caravan's alarm system and, should the alarm trigger, sends a message to the call centre carrying the location of the caravan. The call centre is thus able to phone you and confirm whether the alarm has been triggered by thieves or yourself.

If no alarm is fitted to the caravan you can still benefit from the rapidly communicating ProActive unit by having one of our tiny movement sensors fitted. This is hidden at the time of fitting the main unit and comes with a small switch. Thus you can switch the movement sensor on as you leave the caravan and switch it off when you wish to move it yourself. The movement sensors' sensitivity can be adjusted to meet your own caravan's individual requirements and would normally be set to trigger on the movement of the caravan itself rather than movement within the caravan, thus avoiding false alarm calls.

Because the Phantom Target unit has a backup battery, the unit will still work if the thieves cut the main battery power to the caravan. Cutting power to the system will also alert our control centre, who will again relay this information to the customer.

The unit is hidden in your caravan drawing the minimum of power from your leisure battery. It would take in excess of 6 months for the unit to drain an 85Ah battery so you can take comfort in the fact that while your caravan is in storage, or on site, it is still being protected.

Retail price £499 inc VAT and fitting, and a choice of annual or five year subscriptions at £99 and £349 respectively.

The motion sensor costs an additional £30 if required.

The Phantom Target systems are also the first in the UK to be Sold Secure 'Gold with Control Centre' approved giving caravan owners extra peace of mind.

So you now have a greater understanding of how the Phantom tracking systems can protect your prized possession. Have a look at the benefits and we'll sum up why pound for pound Phantom devices are the best value security devices you can fit to your caravan.

Motor home Security with Phantom Target

Motor homes are a great way to have a home away from home and come with the freedom that you can choose when, where and how long you stay! The only problem is that thieves see a motorhome as an opportunity to earn them some serious money!

You have spent thousands of pounds on your pride and joy and is it really worth wondering whether it will still be on the path when you get home! Is it where I left it?

The perpetrators of vehicle crime have become more sophisticated over recent years and motorhome owners need to go to greater lengths to protect their valuable asset.

Alarms, crook-locks, hitch-locks, and other mechanical failsafes can be a good deterrent but are no longer enough. They may give the thief less time to play with but it is often not enough to prevent theft. Vehicles like these represent easy pickings for a criminal. Given time, a skilled and determined thief will often get his way and your prized possession could, as they say, be history.

Now there are solutions designed to out-smart the thief: the Phantom range from Phantom Limited.

One of the most important features of the Phantom Target is that we have designed the unit with you in mind. We have worked hard on your behalf to make the Phantom Target the best protection available in the motorhome market. Our units are backed up with a fully manned called centre manned 24hrs a day 365 days each year.

Unlike some units on the market if your prize possession is stolen, once you have reported the theft, we will follow it through to recovery with the police. You won't have to track it yourself!

The last thing we want is you to have problems with your motorhome whilst enjoying your holiday so if you want the best protection for your motorhome fit a Phantom!

Phantom. The cost effective, reliable and reassuring tracking system which is helping win the fight against motorhome theft

Only around 10% of stolen motorhomes without tracking devices on are ever recovered! Don't add your motorhome to that statistic.

Phantom ProActive for Motor homes

Motor homes are very much a home from home. With theft a possibility, a great security option worth considering for your vehicle is the Phantom Target Proactive tracking device.

The Target Proactive works in conjunction with your existing alarm system or with the aid of a high tech, low power motion sensor. If your motor home is moved or broken into the alarm or motion sensor kicks into action and triggers the Phantom Proactive. The device then alerts either you or our 24hr Phantom Call Centre.

Whilst you are quickly checking whether your vehicle is unharmed our small unit is busy using state of the art Global Positioning Satellite information to enables our control centre to pinpoint the vehicles location should it be stolen.

In seconds the police are notified and on their way to the vehicle enabling either retrieval of the stolen motor home or interruption of a break in.

This system is ideal for you if you store your motor home away from your home because you will know straight away if anything is wrong.

Unlike some systems Phantom is effective in UK, Ireland and mainland Europe.

If losing your motor home was not incentive enough to install the Phantom many motor home, insurance providers, such as Caravan guard, offer premium discounts of up to 30%!

Installation can be carried out by our nationwide network of professional fitters and the installation will not affect the motor home's warranty.

Protect your motor home with the Phantom Proactive for just £499 including VAT and fitting. All you then decide is whether you want annual subscription at £99 or five year airtime for £349.

We have a good working relationship with the police.

Phantom The device has been co-developed with leading manufacturers and insurance companies to reduce theft of Caravans and Motor homes.

The Phantom is one of the most power efficient products on the market with low battery drain giving a period of several months before the performance could be affected.

The device also contains an internal back-up that will power the tracking process for up to 24 hours should the main power source drain completely.

The Phantom Target systems are the first in the UK to be Sold Secure 'Gold with Control Centre' approved giving motor home owners extra peace of mind.
